

Course Syllabus

5S Housekeeping

The aim of this programme is to enable workers to use the 5S approach to housekeeping in order to support a lean manufacturing process.

This programme is aimed at all personnel who work or who are intending to work within a lean manufacturing process.

By the end of the session candidates will be able to:

- Recognise the value of the 5S process within their workplace
- Identify how each stage of the process would work within their environment
- Discuss the 5 stages and how each one builds and support the other
- Recognise that the process influences product quality and therefore customer perception and ultimately product value
- Discuss how the quality process fits within the policies and procedures of their employer
- Discuss what benefits the 5S process will bring to the working environment i.e. the right equipment at the right place at the right time, in the right quality.

An in-house certificate of attendance will be awarded to all candidates who successfully complete the course.
