

Course Syllabus

Asbestos Awareness

This ½ day Asbestos Awareness training course is designed to meet and exceed the HSE requirements on working with asbestos and demonstrate how to protect your workforce, practically.

Asbestos Awareness training is mandatory for all employees who are likely to come into contact with Asbestos and completion of this training course provides you with certification for a 12 month period in line with HSE Guidance.

Course Content:

- The properties of asbestos and its effects on health
- The products and materials likely to contain asbestos (with images to aid detection)
- A short video appropriate to the type of work undertaken by your employees
- The potential operations that could result in asbestos exposure
- The importance of and types of preventive controls that can be used to minimise exposure
- Your managers responsibilities to protect your workforce and avoid a prosecution
- A practical demonstration of Asbestos Surveys and information on what should be included
- Information on safe work practices including control measures and protective equipment
- The use and maintenance of respiratory protective equipment
- Emergency procedures to deal correctly with an asbestos incident

An in-house certificate will be awarded to all candidates upon successful completion of the course.
