

Course Syllabus

COSHH Awareness

This course is aimed at all personnel who work with, or come into contact, with Hazardous Substances during their working day.

The aim of the course is to;

- Raise awareness of COSHH within industry.

By the end of the session candidates will be able to:

- Describe the legislation surrounding COSHH
- State the relation between the legislation and the organisation they work for
- Identify the range of products and substances that are covered by COSHH
- State the forms that Hazardous Substances can take
- Identify the routes of entry of hazardous substances into the body
- Describe the hierarchy of control measures that are used when dealing with hazardous substances
- List suitable PPE that could be used when using hazardous substances

An in-house certificate of attendance will be awarded to all candidates who successfully complete this course.
