

Course Syllabus

Correct Use of PPE / RPE

According to the Hierarchy of Control, PPE should be used as the last resort, ie: all other ways of eliminating the hazard should have been exhausted; however, PPE is not effective if you don't know how to use it properly.

This course has been designed to give candidates information on how to choose the correct type of Personal Protective Equipment or Respiratory Protective Equipment for a given task as well as providing them with an overview of the correct ways in which they should use the chosen equipment.

The course is aimed at anyone who needs to use or is responsible for PPE / RPE as part of their job; managers, supervisors, shop floor workers and contractors.

Certification

An in-house certificate of attendance will be issued to anyone who successfully completes the course.
