

Course Syllabus

HAVS Awareness

This course is aimed at all personnel who work with tools or machinery that cause vibration on a daily basis.

The aim of the course help agents, supervisors, site managers and workers to manage HAVS in accordance with current legal provision and also to develop an understanding of the need to eliminate vibrating tool use, how to control and reduce exposure to HAVS and update personnel on company policy and procedures.

By the end of the session candidates will be able to:

- Understand what Hand Arm Vibration is and which tools are most likely to create risk?
- Describe what is meant by Exposure Action Value and Exposure Limit Value, so that you understand how long vibratory tools can be safely used for and what controls can be put in place.
- Demonstrate what HAVS and Carpel tunnel syndrome is and what are the early signs and symptoms to look out for?
- Explain why health surveillance is important and what it entails?
- Contribute to discussions around how the workforce can be protected.

By the end of the period of training, delegates will be aware of and be able to:

- Implement HAVS procedures
- Demonstrate an awareness of industry best practice

Certification

An in-house certificate of attendance will be awarded to all candidates who successfully complete this course.
